

Replacement Generation Meter

All generation meters must be listed on **Schedule 4**: UK nationally approved electricity meters.
This can be checked online:

<https://www.gov.uk/government/publications/schedule-4-uk-nationally-approved-electricity-meters>

We would recommend that you provide your customer with all relevant documentation, such as invoices or correspondence should Ofgem request any further information.

Documentation / Information Required

- ☐ **Installers report on your letterhead paper providing.....**
 - A description of the fault
(e.g. meter was blank or not recording)
 - A timeline of events
(e.g. when the fault was noticed, when were you notified, when it was replaced)
- ☐ **Photo of the faulty meter**
- ☐ **Photo of the new meter clearly showing the make, model and serial number**
- ☐ **Photo of the inverter showing the total generation reading**
- ☐ **Photo of the inverter nameplate**
- ☐ **Amended schematic diagram showing the entire system i.e.**
 - Generation meter make, model, serial number
 - Inverter make, model
 - Panel count, rating make and model
