

12 steps for moving house in Northern Ireland

- 1. Confirm moving date**
The first step is to confirm your moving date.
- 2. Provide notice to landlord (if relevant)**
If you're currently renting, at this point you can hand in your notice to your landlord.
- 3. Notify Power NI and other utility suppliers**
Next, it's time to tell your utility suppliers that you're moving. At Power NI, we've made this as easy as possible. You can transfer your electricity account by updating your details in the 'Moving House' section of your online account.
- 4. Notify important people**
Now you can tell other contacts and organisations that you're moving. For example, your bank, your insurance company and your doctor's surgery.
- 5. Declutter**
Before you start packing, it's time to make sure you're not moving things you don't need.
- 6. Organise removal logistics**
Now you need to plan for the logistics of moving from A to B.
- 7. Begin packing**
- 8. Pay final bills**
In the final days before your big move, put in place plans for tying up any loose ends at your current property.
- 9. Stock up on essentials**
Ahead of moving day, stock up on all the essentials that you might need on the first night in your new home.
- 10. Final walk through & goodbyes**
When moving day arrives it's time for a final check of your old house before leaving.
- 11. Enjoy moving day**
- 12. Post-move duties**
There are just a few post-move jobs to take care of that we'd recommend, including cleaning, unpacking and changing the locks to help make your house a safe home.
